Independent Auditors' Report on Internal Control

Board of Directors
Valley National Investments, Inc.
Allentown, Pennsylvania

In planning and performing our audit of the financial statements of VALLEY NATIONAL INVESTMENTS, INC. for the year ended December 31, 2001, we considered its internal control structures, including procedures for safeguarding securities, in order to determine out auditing procedures for the purpose of expressing out opinion on the financial statements and not to provide assurance on the internal control structure.

Also, as required by Rule 17a-5(g) (1) of the Securities and Exchange Commission, we have made a study of the practices and procedures (including tests of compliance with such practices and procedures) followed by VALLEY NATIONAL INVESTMENTS, INC. that we considered relevant to the objectives stated in Rule 17a-5(g) (1) in making the periodic computations of aggregate indebtedness and net capital under Rule 17a-3(a) (11) and the procedures for determining compliance with exemptive provisions of Rule 15c3-3(e) (2) in making the quarterly securities examinations, counts, verifications, and comparisons and the recordation of the differences required by Rule 17a-13; and (3) in complying with the requirements of prompt payments for securities under section 8 of Regulation T of the Board of Governors of the Federal Reserve System.

The management of the Company is responsible for establishing and maintaining and internal control structure and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, management is required to make estimates and judgments to assess the expected benefits and related costs of internal control structure policies and procedures and of the practices and procedures referred to in the preceding paragraph, and to assess whether those practices and procedures can be expected to achieve the Commission's above-mentioned objectives. The objectives of an internal control structure and of the practices and procedures are to provide management with reasonable, but not absolute, assurance that (1) assets for which the Company has responsibility are safeguarded against loss from unauthorized use or dispositions and (2) transactions are executed in accordance with management's authorization and recorded properly to permit preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in any internal control structure of the practices and procedures referred to above, errors or irregularities may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

Our consideration of the internal control structure would not necessarily disclosed all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in the amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving the internal control structure, including procedures for safeguarding securities that we consider to be material weaknesses as defined above.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the Commission to be adequate for its purpose in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures were adequate at December 31, 2001, to meet the Commissioner's objectives.

We also believe that the Company was in compliance with the exemptive provisions of Rule 15c3-3. No facts came to our attention indicating that such provisions had not been complied with during the year ended December 31, 2001.

This report is intended solely for the use of management, the Securities and Exchange Commission, the New York Stock Exchange, and other regulatory agencies, which rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 and should not be used for any other purpose.
